Hemanta Thapa

AI Engineer

San Francisco, CA | (510) 730-2994 | thapahemanta.dev@gmail.com | thapahemanta.netlify.app | linkedin.com/in/thapahemanta

SUMMARY

Software engineer with an MS in Artificial Intelligence (August 2026) and 2+ years shipping production web applications. Built a tool-using LangGraph agent and a RAG chatbot, with a focus on reliability, tracing, and cost control.

PROJECTS

DoveAI | Personal AI Assistant | LangGraph, FastAPI, Supabase, React, Langfuse

- Built a 40-tool LangGraph agent for Telegram and web that handles Whisper voice, images, PDFs, and Gmail drafts.
- Added guardrails, including PII redaction (Luhn-checked), injection sanitizing, and a verification gate for unbacked replies.
- Routed models per role (Gemini, OpenAI, Deepseek via OpenRouter) from a Settings UI, with spend under $1 in 5 weeks and 24 pytest suites.

RAG FAQ Chatbot | MSAI 631 | Python, PDFPlumber, sentence-transformers, FAISS | github.com/hemanta12/FAQ-chatbot

- Built a handbook RAG chatbot in a 5-person team: page-level chunking, MiniLM embeddings, FAISS retrieval, Phi-4-mini answers.
- Fixed a chunking failure (77 pages in 1 chunk) with page-level splitting; adaptive top-5 retriever (margin 0.4, ceiling 1.25) declines out-of-scope questions.

BrokeEven | Expense-Splitting PWA | React, TypeScript, Express, PostgreSQL | github.com/hemanta12/brokeeven

- Shipped a real-time expense-splitting PWA with cent-exact splits; 9 active users, 299 Vitest tests, CI on every push.

EXPERIENCE

Takeo Tech LLC, New York, NY | Software Engineer (Part-Time, Remote) *Aug 2024 – Jan 2025*

- Developed 15+ RESTful APIs (Node.js/Express) for profile management, job referrals, and notifications.
- Added an alumni networking module to the React portal, increasing engagement by 15%.
- Containerized services with Docker and deployed via Jenkins CI/CD to AWS EC2, improving deployment speed by 25%.

Kuebiko, Inc, Euless, TX | Programmer Analyst/Software Developer (Full-Time, Remote) *Feb 2023 – Jul 2024*

- Built an Applicant Tracking System (React, Node.js, MongoDB) replacing spreadsheets for 200+ users, cutting HR effort by 40%.
- Built a timesheet and billing app (React, Node.js, MySQL) with approval workflows and PDF invoicing for 20+ consultants.
- Migrated legacy candidate data to MongoDB with Python scripts, improving query speed by 20%.

EDUCATION

University of the Cumberlands, Williamsburg, KY | MS in Artificial Intelligence, Aug 2026

San Francisco State University, San Francisco, CA | BS in Computer Science, Dec 2022

Certification: AWS Certified Cloud Practitioner (Sep 2024)

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java

Frameworks: LangGraph, LangChain, FastAPI, React, Express.js, Node.js, Django, pytest

ML/GenAI: RAG, LLM APIs (OpenAI, Gemini), FAISS, Langfuse, TensorFlow/Keras, prompt engineering, Pandas, NumPy, Claude Code

Cloud & Data: AWS (EC2, S3), Supabase, PostgreSQL, MongoDB, Railway, Vercel, Docker, GitHub Actions
